

At Ramalynn Academy, reading instruction starts at age 3 and continues all through the elementary levels. Not only does Ramalynn provide a strong phonics program, a love of literature is instilled that carries on all the way through middle school and junior high. The solid foundation provided in the primary and early elementary is evident with our students' reading scores. 72% of our elementary students (first through third grades) are reading at least a year above grade level. Here is the breakdown among grades:

At the first grade level, 29% of the students read at a first grade level, while 63% are reading at or above a second grade reading level.

Our second grade students are even more impressive, with 89% reading at or above a third grade reading level.

Finally, 70% of our third grade students are reading at or above a fourth grade reading level.
